NOTE: I have not personally used all of these service vendors. Many are contacts I have made at home/garden shows where I either talked with them or saw displays or products that impressed me. Some on this list are personal referrals from friends and associates.

I want to maintain a list of GOOD resources, so please let me know if you have a BAD experience with someone ON my list. I like to hear positive reports, too, so I can guide new clients toward those who do the best work. Also, let me know if you have a good experience with someone NOT on my list.

Remember... Buyer Beware! Ask for references and, if it is important to you, check licenses, worker's comp, insurance, etc.
